PROMOTION DAY The 2024 School Year Ended With a Celebration

After three years of pre-school and early childhood education, these children are ready to head on to the public schools. They have already learned letters and numbers, and many of them are already doing simple addition and subtraction.

Even more importantly these children have learned to work together in groups, and they have learned that each one of them is an important person and needs to be respected. They have learned that they have the rights and responsibilities of living in their world.

The 2025 School Year is underway. This is the 29th year that La Escuelita has worked to provide a safe, child-friendly learning environment for the children of the very neighborhood where the teachers themselves grew up.

This is the only pre-school anywhere nearby, and many parents bring their children several blocks and even across a major highway because they know that their children will receive a hot meal, a strong educational beginning and teachers who care about them.
